

HYDRO-SPRAY

Wash MORE. Wash BETTER.

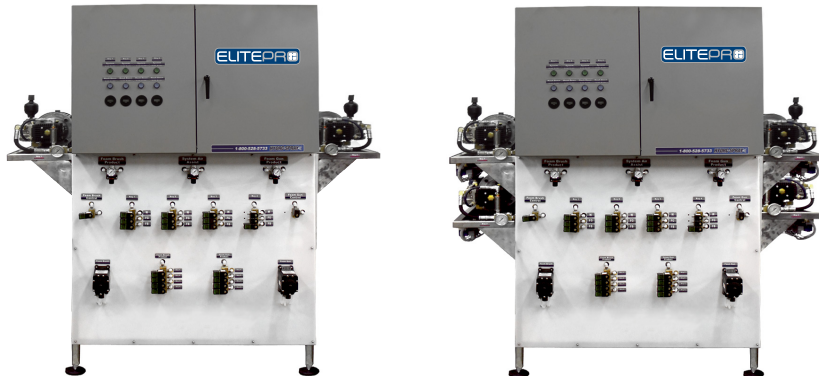

ELITEPRO 

SELF-SERVE WASH EQUIPMENT

POWERFUL WASH PERFORMANCE

Whether you're just getting started in the car wash industry or a seasoned operator, the Elite Pro is designed to minimize costs, maximize profits, and give your customers a stellar user experience. A one bay/one pump design (made possible by an advanced VFD motor), the Elite Pro eliminates the cost associated with multiple pumps and removes the need for complicated check valves. It also reduces the overall number of components in your car wash and uses high quality, stainless steel construction designed to reduce required maintenance.

The Elite Pro's "plug and play" design allows you to get connected quickly and easily. It arrives pre-plumbed, pre-wired and fully labeled. Installation is quick and simple. And once you are up and running, the Elite Pro's substantial feature set includes a Wash Down program that allows you to clean the floor and walls of your bay with the press of a button. The nine on-board Standard Adjustable Functions give you flexibility and control over your wash... which include the following: high-pressure rinse, high or medium-pressure soap, high or medium-pressure wax, medium or low-pressure spot free rinse, low-pressure presoak, low-pressure wheel & tire, low-pressure bug remover, low-pressure foam wax, and low-pressure foam brush. Imagine the possibilities...all in one unit!

FROM LEFT TO RIGHT:
ELITE PRO TWO (2) BAY CONFIGURATION, ELITE PRO FOUR (4) BAY
CONFIGURATION, ELITE PRO SIX(6) BAY CONFIGURATION

FEATURES:

One Bay/One Pump Design

- Compact Modular Frame
- Welded 304 Stainless
- Service Friendly
- Plug & Play Factory Tested

Inverter Rated Electric Motor

- Worldwide 5HP/3 Phase
- Direct Drive
- VFD Driven

Platinum Series General Pump

- Model PEHT201 OS
- Pulsation Dampener
- Pressure Gauge

Eaton PLC Controlled

- Customizable Settings
- Network Ready
- Remote Access Ready
- Temp Card Ready
- Simple 1/0 Operation

Down Stream Chemical Injection

- Features Rocket Injectors
- Controlled Delivery
- Precise Chemical Metering
- Enhanced Foaming Applications
- Tankless Design

Integrated Weep or Blow Down

- Select Weep Water
- Select Blow Down

Integrated Air Assist

- 3 Independent Air Settings
- Smart Air Regulator

Multi-Pressure Applications

- Rinse
- Soap
- Wash
- Spot-Free Rinse
- Pre-Soak
- & Optional

SPECIFICATIONS:

Electrical

- 230V / 3HP/60Hz/13.6A
- 20A Circuit Breaker

Water

- Hot Inlet 3/4" NPT
- SGPM per unit
- 40-60 PSI Regulated
- Max. Temp. 130F
- Cold Inlet 3/4" NPT
- SGPM per unit
- 40-60 PSI Regulated
- Spot-Free Inlet 3/4" NPT
- 1-3 GPM per unit
- 40-60 PSI Regulated
- Can be gravity supplied

Compressed Air

- Inlet 3/8"OD Polyflow
- 3-SCFM per unit
- 80 PSI Max. per unit

Dimensions

- 24"x28"x68" (WxDxH)

OPTIONS:

Multi Pressure Pumps

- GP Emperor HTX (Direct Drive)

Controls

- Temperature Control Card
- Network Remote Access
- Inlet Water Supply Regulators

Multi Pressure Delivery

- High Pressure Soap
- High Pressure Wax
- High Pressure Undercarriage

Components

- Foam Generators
- Check Valve Assemblies
- Spare Parts Kit
- Caster Kit
- Install Kit

HYDRO SPRAY

A HIGHER INDUSTRY STANDARD

Hydro-Spray's Elite Pro system offers unparalleled performance and efficiency. This tankless self-serve car wash system is easy to use, easy to install, and easy to repair and can be used for different car wash applications. The plug-and-play design was designed by car wash operators, for car wash operators with high quality components and rugged stainless steel frames. These pump stands not only meet, but exceed expectations, making them the perfect solution for operators looking to enhance performance.

ELITEPRO

ADVANTAGES:

- CHEMICAL SHOW
- HIGHER PRESSURE
- EXTENDED WARRANTY
- STAINLESS STEEL
- 1 BAY/1 PUMP DESIGN
- EASY TO INSTALL
- EASY TO OPERATE
- COMMON SPARE PARTS
- QUALITY COMPONENTS
- SAVES YOU MONEY
